PROFILE

I am communicative, passionate about technology, and self-motivated. I have a logical and practical profile, and I have some ease in thinking about solutions to problems and business opportunities. In addition, I am always studying and acquiring new knowledge. Despite having a more rational and logical profile, I have an excellent interpersonal relationships because I am an extroverted person who always seeks a good work environment.

My main soft skills today are communication and teamwork, flexibility, creativity, proactivity, and critical thinking. And my main point for evolution is to develop a spirit of leadership.
